**Subject:** Addendum submittal

Greg, John, & Bill,

After our discussions over various issues, and per our telephone discussion this afternoon, Tradewinds will be submitting a final addendum which will supersede the one dated July 11, 2007.

Some parts of the November 2006 application will remain valid while other parts will not. In anticipation of written public comments that may be submitted, do you have any suggestions on how we can minimize confusion in what parts of the Nov application still apply and in referencing parts of either the Nov application or the new addendum?

April
